## ICZ AND PCZ/ACZ DRIP CONTROL ZONE KITS

*Durable and Convenient Control Zone Kits Designed for Commercial Site Conditions*

**ICZ Drip Control Zone Kit:** For the demanding low flow requirements of commercial job sites, Hunter's ICZ Drip Control Zone Kit is here. This convenient all-in-one kit, offers the superior performance of the Hunter ICV valve with Filter Sentry along with a stainless steel filter and high flow pressure regulator. Because the kit includes pressure regulation that ensures a consistent 25 or 40 PSI, the ICZ makes it possible to accommodate drip needs in an environment where it would normally be difficult to do so. With everything pre-assembled and water tested, the ICZ provides a hassle-free way to install drip zones on commercial jobs.

**PCZ/ACZ Drip Control Zone Kits:** These pre-assembled kits bring together the popular PGV valve with both a filter and a pressure regulator, providing you with a complete control zone. The PGV valve features high-grade material construction, including a bonnet made of reinforced glass-filled nylon. Rounding out the kits elements are a stainless steel filter screen, flush cap and pressure regulator to maintain a consistent 25 or 40 PSI. To save both time and labor use the ACZ kit to meet your anti-siphon needs.
